A Beggar's Book Out-worths a Noble's Blood.[1]
*William Shakespeare (1613)*

Some books are to be tasted, others to be swallowed,
and some few to be chewed and digested.
*Francis Bacon (1597)*

Les plus grands analystes eux-mêmes ont bien rarement dédaigné de se tenir à la portée de la classe *moyenne* des lecteurs; elle est en effet la plus nombreuse, et celle qui a le plus à profiter dans leurs écrits.[2]
*Anonymous referee (1825)*

It is true, we have already a great many Books of *Algebra*,
and one might even furnish a moderate Library
purely with Authors on that Subject.
*Isaac Newton (1728)*

فحررت هذا الكتاب وجمعت فيه جميع ما يحتاج اليه الحاسب
محترزا عن اشباع ممل و اختصار مخل[3]
*Ghiyāth al-Dīn Jamshīd bin Masʿūd bin Maḥmūd al-Kāshī (1427)*

[1] The sources for the quotations are given on pages 725–729.

[2] The greatest analysts [mathematicians] themselves have rarely shied away from keeping within the reach of the *average* class of readers; this is in fact the most numerous one, and the one that stands to profit most from their writing.

[3] I wrote this book and compiled in it everything that is necessary for the computer, avoiding both boring verbosity and misleading brevity.
